

CESM Software Engineering Working Group Session
Tuesday, 19 June 2012
The Village – Tarn Room – Breckenridge, Colorado

Opposite Land and Ocean

- 8:30 a.m. [Mariana Vertenstein](#) – CSEG Summary
- 8:50 a.m. [Nancy Collins](#) – Status of using DART with multi-instance CESM
- 9:05 a.m. [John Tannahill](#) – Three years of doing uncertainty quantification ensemble runs at LLNL
- 9:20 a.m. [Alice Bertini](#) – The CESM experiment database
- 9:50 a.m. [Anke Kamrath](#) – NCAR’s new data-intensive supercomputing environment and a look at future computing challenges
- 10:10 a.m. [Pat Worley](#) – Capturing computer performance variability in CESM experiments
- 10:45 a.m. [Rob Jacob](#) – Update on MCT and ParVis
- 11:10 a.m. [Bill Collins](#) – SciDAC3: Multiscale methods for enabling scale-aware capability in CESM
