

South American Climate Biases Cross Working Group Session
Tuesday, 21 June 2016
The Village – Elk Room – Breckenridge, Colorado

- 1:30 p.m. Rich Neale – Overview of South American climate biases in CESM
- 1:45 p.m. Julio Bacmeister – Source of Andes biases: Sensitivity experiments and potential solutions
- 2:00 p.m. Ben Sanderson / Dave Lawrence – Perturbed ensembles and CLM Amazon sensitivities
- 2:15 p.m. Discussion and future analyses
- Convection organization
 - Moisture recycling
 - Diurnal cycle
 - Terrain following coordinates
 - Atmosphere configuration / parameterizations
 - Land configuration / parameterizations
 - Further sensitivity experiments
- 3:00 p.m. *Adjourn and break*
